Panaz Highland Teal

Panaz Highland Wheat

Flooring

We can supply and fit a range of flooring from carpet and vinyl to safety and non-slip flooring. Our free measuring and estimation service means the price you are quoted is the price you pay.

Carpet

Equinox™ Tones

A cut pile, solution-dyed range available in a variety of contemporary colours. The tonal design combined with a pile weight of 1100 grams makes this carpet suitable for bedrooms and circulation areas in a variety of environments.

It incorporates innovative features including;

- Prism fibre - A yarn which has been cross section engineered to deliver purity in colour. It is combined with light refraction properties which helps to defuse visual soiling.
- Bi-Ome® - An antimicrobial carpet treatment which coats the carpet fibres killing micro-organisms when they come into contact with the fibre. It retains its strength over time and stops microorganisms adapting to the environment.
- Aqua Bac - An impervious membrane which gives assurance against sub-floor contamination. It forms part of the carpet backing, and has been engineered to allow sub-floor moisture to evaporate whilst preventing surface liquid penetration. It also acts as a non thermal insulator, reduces sound impact levels, and provides a built in cushioned underlay.

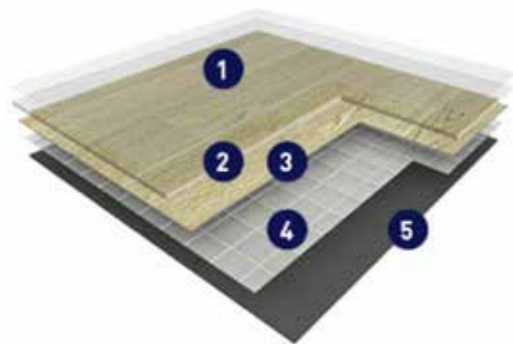

Vinyl

Taralay Impression Control

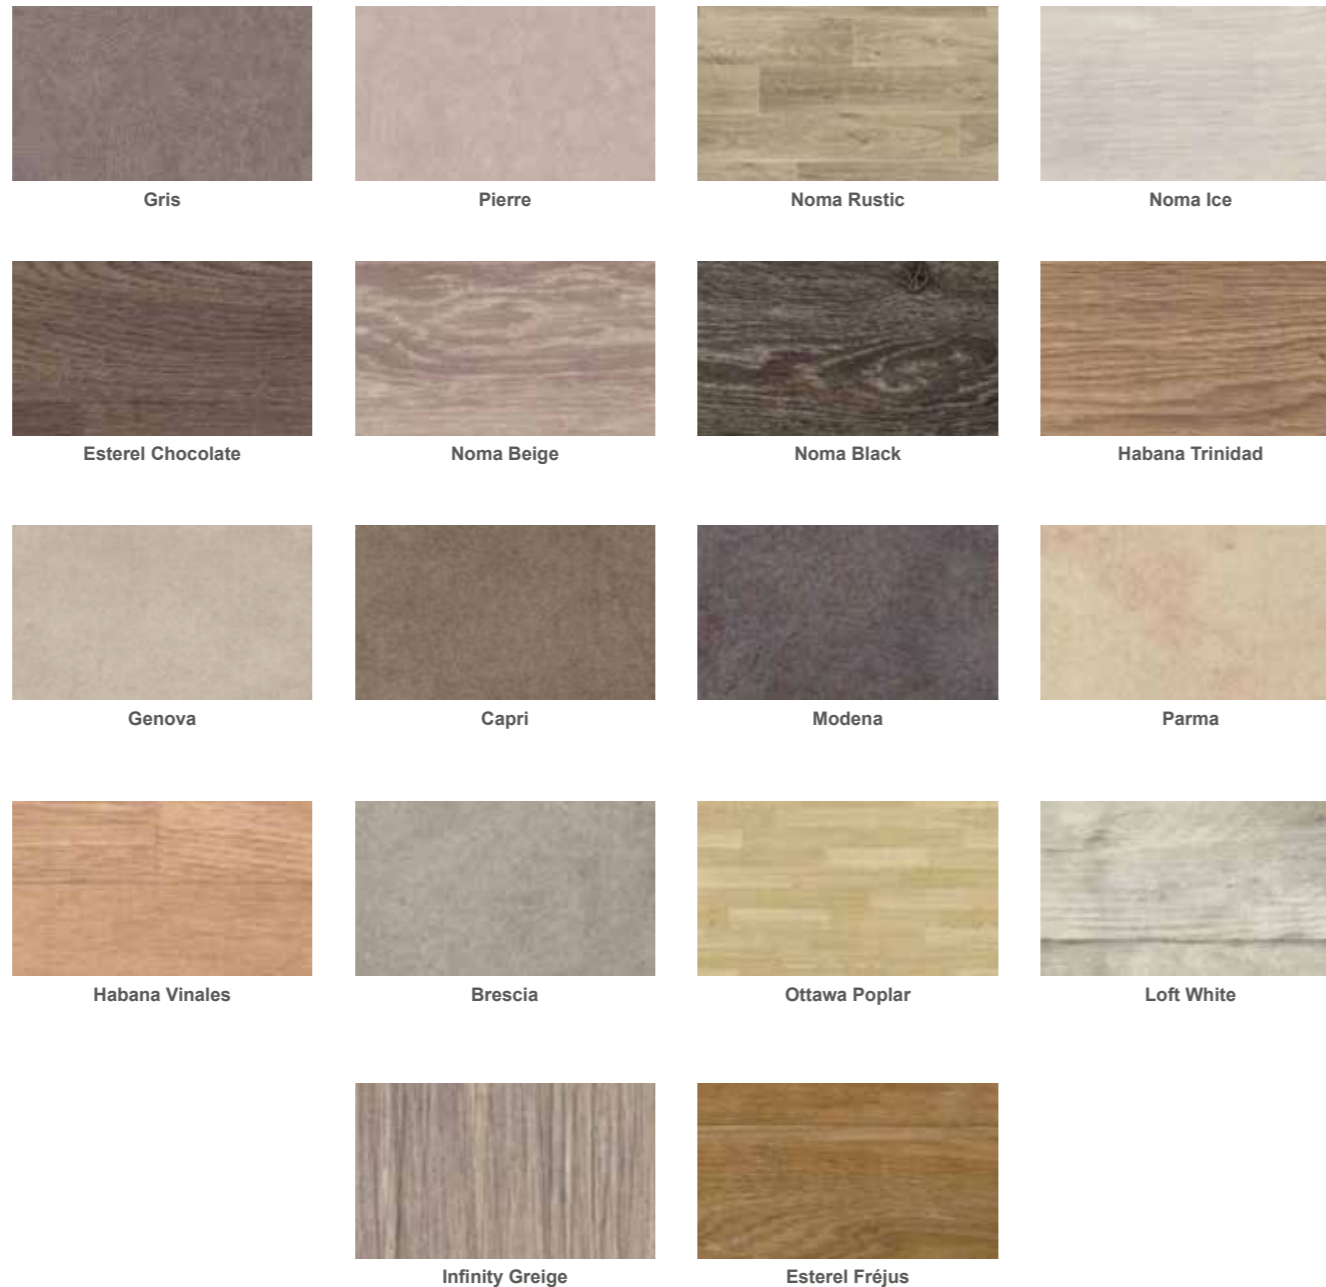

This collection is ideal for hardworking places and has been designed for a wide range of contract applications. A tough safety flooring that offers slip resistance and high performance.

Available in 18 colourways, this vinyl sheet flooring is suitable for healthcare settings with its hygienic UV cured ProtecSol® Control surface treatment, making it easy to clean and maintain.

HSE 36+ slip resistance, an R11 wet slip resistance rating and >20 Rmt/Rz surface roughness.

1. ProtecSol® Control treatment
2. Transparent wearlayer
3. Printed design
4. Fibre Glass Grid
5. Compact backing

Safety Non-Slip Flooring

Polysafe Standard PUR

A range of slip resistant sheet flooring that fully conforms with HSE & UK Slip Group Guidelines and meets the requirements of the European Safety Flooring Standard - EN 13845.

It is constructed from vinyl, coloured quartz, aluminium oxide and silicon carbide to improve traction and safety underfoot.

Independently assessed by the British Board of Agrément with product performance assured for at least 10 years in recommended use areas.

Sustainable wet slip resistance assured throughout the guaranteed life of the product.

High quality, cross-linked polyurethane reinforcement and UV cured for superior cleaning benefits.

Ideally suited for heavy traffic areas where there are risks of water spillage and other contaminants in commercial and residential areas such as washrooms, WCs and food preparation areas.
